

PFAS in Textiles, May 4, 2023

10.30–12.00 AM CEST.

Walk the Talk and say NO to PFAS! –
A Workshop on alternatives and concrete actions.

'Forever Chemicals' will be banned in the textile industry – it's just a matter of how many exceptions we allow. To make a positive impact is in our hands. In this workshop you will learn how the textile industry (e.g. OekoTex and bluesign) is responding to PFAS restrictions and what proven alternatives already exist. To stay ahead of the curve, you will also be guided on how to take concrete steps in the ECHA consultation process and thus contribute to banning PFAS from the textile industry. Join us for this must-attend workshop featuring leading experts from EOG, ChemSec and RISE.
